MiGreat!

MiGreat! project is an Erasmus+ project (2016-2018) which aims at developing training procedures and tools to support training and employability of migrants in partner countries. The project aims to improve the skills of VETPROs working with immigrants, migrant workers and refugees transferring the successful vocational training pedagogy Cicero, used in Sweden, supported by eLearning.

The project will develop a mobile app based upon 'coaching principles' and an OER (Open Educational Resources) platform with a set of educational modules which provide a pleasurable and motivating method of learning.

The main project's target group consists in VETPROs working with immigrants. The secondary target group includes people with migrant background, migrant workers and refugees.

MiGreat! project's kick off meeting was held on 10 – 11 November 2016 in Fano, Italy, hosted by the project coordinator Training 2000 and partners attending from, UK, Sweden, Austria, Greece and Switzerland. During the meeting the project discussed and confirmed the project outputs and set up a timeline for delivery, which will be crucial for the efficient delivery of the results. Delivery of training material and its modules were delegated to the respective partners.

Work is ongoing for the extended needs analysis, where we are asking VETPROS about their real needs for training material for migrants. The results will be integrated into the training material.

Our OER platform has been through three development stages and a new domain registered. It is being tested and de-bugged in each partner language. The first draft of the modules "Social Partners" and "Working In" will soon be ready to view on the project website.
